Project part 1 Evaluation Grid

Skills	Observable	Points	Observable Criteria	Points obtained
C01 – Set up a collaborative infrastructure and effective Git workflow	Git & Branch Management	0	No branches created or poor use of Git (commits directly to main).	
		2	One or two branches exist but poorly named or without pull requests.	
		3	Branches are properly named, with meaningful commit messages.	
		5	Clear branching model (feature/bugfix), well-managed PRs.	
C02 – Ensure code quality through testing and continuous integration (CI)	Unit Testing & Coverage	0	No tests provided.	
		2	Some tests exist but incomplete or non-functional.	
		3	Relevant unit tests cover main functions.	
		5	Test Coverage above 90%	
C03 – Use a collaborative project management tool (Trello or equivalent)	Trello Board & Workflow	0	No Trello board	
		2	Trello board exists but not aligned with Git workflow.	
		3	Trello board structured (To Do / In Progress / In Review / Done) with partially filled cards.	
		5	Trello board complete and active: detailed cards (checklists, assigned members, PR links).	
C04 – Collaborate effectively using code review	Code Review & Pull Requests	0	No pull requests or direct merges to main branch.	
		2	Pull requests exist but without comments or peer review.	
		3	Reviews done but with minimal feedback.	
		5	Complete, constructive code reviews; both students validate each other's work.
